PROFESSIONAL SUMMARY

Frontend Developer with more than 5 years of commercial experience building desktop and web applications using JavaScript (ES6+), TypeScript, React.js, Redux, and Angular. Delivered features for large-scale consumer products in PDF editing and photo processing, used by millions of users worldwide. Skilled in component-based architecture, state management, performance optimization, REST API integration, and unit testing with Jest. Comfortable in Agile/Scrum cross-functional teams and product-driven environments.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js (Hooks, Context API), Redux, Redux Toolkit (RTK), React Router, Angular, SciterJS, Next.js
- **Styling:** Sass/SCSS, CSS-in-JS (styled-components, Emotion), CSS Modules, responsive design, cross-browser compatibility, BEM, Flexbox, CSS Grid, Tailwind CSS
- **Performance & Quality:** code splitting, lazy loading (React.lazy, dynamic imports), memoization, virtualization, accessibility
- **Testing:** Jest, React Testing Library (RTL), unit testing, integration testing, debugging
- **Tools & Build:** Git, Vite, Webpack, Babel, ESLint, npm/yarn, REST APIs, Chrome DevTools
- **Workflow:** Agile/Scrum, Jira, code reviews
- **Design Collaboration:** Figma, Adobe XD
- **AI-Assisted Development:** Claude Code, Codex

PROFESSIONAL EXPERIENCE

Frontend Developer — Avanquest (Claranova Group)

11/2021 - Present

Avanquest (Claranova Group) is a leading international software developer and publisher (SaaS), specializing in consumer and business solutions. The company operates in three main areas: utilities, PDF processing, and photo processing, offering innovative tools in over 100 countries.

Inpixio Photo Studio

- Developed UI for a desktop photo editing application targeting consumer and prosumer users
- Implemented reusable components and helped establish the project architecture from early stages
- Improved application responsiveness and user experience through targeted performance optimizations
- Collaborated closely with designers, backend developers, and QA engineers in a cross-functional team

Soda PDF Desktop

- Developed UI features for a desktop PDF editor distributed to a global user base
- Built reusable React components and structured project architecture for long-term maintainability
- Investigated and fixed production issues reported by QA and end users, improving application stability

Soda PDF Online

- Developed new features and refactored legacy modules of a web-based PDF editor used by millions of users monthly

- Implemented reusable UI component library with Sass/SCSS, ensuring consistent design across the product
- Integrated REST APIs for document processing, authentication, and subscription management
- Wrote unit tests with Jest, contributing to test coverage growth and reducing regression bugs
- Collaborated with designers in Figma and participated in code reviews and Scrum ceremonies

UI/UX Developer — Avanquest (Claranova Group)

01/2017 – 11/2021

Products: Soda PDF Desktop, PDF Architect, PDF Suite

- Built responsive, pixel-accurate UI from Figma and Adobe XD designs using semantic HTML5, CSS3, and Sass/SCSS (BEM)
- Implemented reusable, themeable UI components and layout templates across desktop PDF applications
- Ensured cross-browser compatibility and consistent rendering across the product line
- Worked closely with designers and developers to integrate markup into the application UI layer, improving visual consistency

Earlier experience: HTML/CSS/JavaScript (jQuery) developer roles at LULU Software (2013–2017) and Lavasoft (2011–2013), Kharkiv, Ukraine.

EDUCATION

Engineer's Degree, Computer Science

Kharkiv National University of Radio Electronics, Kharkiv, Ukraine

LANGUAGES

- **English** — B2 (Upper-Intermediate)
- **Ukrainian** — Native
